※ Use RESU only in accordance with following conditions for Off-Grid use

- 1) Battery inverter shall follow charge/discharge current limit, received from Battery communication, and operate within this current limit.
- 2) To prevent battery deep discharge, LGC recommends inverter always keep battery SOC over 1%* and over 42V.

※ More compatible inverters to be added.

○ Compatible

○* RESU Output power is insufficient compared to inverter output power . Compatible if the inverter follow the Output Power Limit of RESU.
